# Engaging Community Health Workers in Patient Care

After participating in this webinar, clinicians will be able to:

- Define what a Community Health Worker (CHW) is and what they do.
- Compare the CHW role with other types of health professionals.
- Identify the benefits and outcomes of including CHWs in the patient care team.
- Examine the role of a CHW in reaching specific types of patients.
- Discuss how to effectively engage with a CHW as part of a healthcare team.

Continuing Medical Education (0.25 credit) will be offered for MD, DO, PA, and NP. One contact hour will be offered for social workers.
