Grant Proposal Writing Workshop

August 17, 2022

The MDI Biological Laboratory will host a grant writing workshop co-led by Drs. Iain Drummond and James Coffman with material from Dr. David Dawson. Dr. Drummond is a MDI Biological Laboratory Professor and the Director of the Davis Center for Aging and Regeneration and Dr. Coffman is a MDI Biological Laboratory Associate Professor and Director of Maine INBRE. Dr. Dawson is a Professor Emeritus, Department of Physiology and Pharmacology at Oregon Health and Science University, and a former director of MDI Biological Laboratory.

This will be offered as an interactive workshop event. Individuals participating in the workshop portion of the event will develop and submit a 1-2 page “mini proposal” based on guidelines and principles provided in advance of the workshop. These mini-grant proposals will be reviewed by assigned participants and the senior faculty in a mock study section.

New investigators and junior investigators are especially encouraged to take advantage of this unique opportunity.

Enrollment priority is given to INBRE project leaders and INBRE research training faculty.
