

*UNE Office of Research and Scholarship presents*

## Outreach to UNE faculty on Maine Space Grant Consortium funding opportunities

Terry Shehata, Ph.D.

Executive Director, Maine Space Grant Consortium  
Director, Maine NASA EPSCoR Program

UNE faculty have the opportunity to better understand the funding opportunities available from the Maine Space Grant Consortium to support research, curriculum development, student research experiences and internships. Eligible topics cover the broad spectrum of NASA's interests from life sciences to engineering directly related to space exploration and development as well as applications of knowledge gained from space exploration to improve life on Earth. Faculty members will also become familiar with other activities in Maine they will be able to access, including but not limited to the IDEAS Lab for proposal development to NASA, High Altitude Ballooning Program for research and education, and the K16 Cubesat Program. Additionally, faculty members will have a better understanding of research and education opportunities that will become available as the result of the development of the Maine Space Complex.

Thursday, April 20, 2023 | 12 -1 pm via Zoom
