

NASA Research Opportunities Now Available

The Maine Space Grant Consortium (MSGC), a non-profit organization, is pleased to announce a special opportunity for undergraduate students at Maine Colleges and Universities who are interested in a challenging research experience with a mentor **at a NASA field center**. Students will also develop career contacts throughout the state of Maine. The experience will involve a ten-week session (typically during the summer) with mentors at any one of the 10 NASA field centers. Students will receive a total stipend and travel allowance of \$7,300.

Eligibility

- Must be a U.S. Citizen
- Must be classified a rising sophomore, junior, or senior after the spring of 2024
- Must have a minimum 3.0 GPA on a 4.0 Scale
- Must be enrolled full time in an accredited Maine Academic Institution
- Must be pursuing a career in the STEM (Science, Technology, Engineering and Mathematics) fields, or K-12 teaching of science, or in the management of science with a strong science background
- Demonstrated strong extracurricular interest in one of the above careers or disciplines (e.g., science, math, engineering fairs, clubs or awards; tutoring/mentoring; internships, etc.)
- After the NASA research experience, student must submit an extended abstract and make at least two oral presentations regarding their NASA experience. One presentation is required at the MSGC Board or annual meeting; other presentations will be at Maine high schools, and/or other relevant venues.
